

NAUFAL NABILA

MIDDLE ODOO DEVELOPER | ENTERPRISE ERP, REPORTING & INTEGRATIONS

Indonesia | naufal.nabila.2008@gmail.com | linkedin.com/in/naufalnabila | github.com/naufalnab

Portfolio: naufalnabila.my.id/en/

PROFESSIONAL SUMMARY

Middle Odoo Developer with professional Odoo experience since December 2023 and an earlier background in Flutter, PHP and Java development. Hands-on work across enterprise reporting, purchasing and invoice workflows, Odoo 16 attendance imports, cross-version ERP migration engagements and Odoo-SAP synchronization. Recognized as Best Developer of the Year (2024) by PT Arkana Solusi Digital.

TECHNICAL SKILLS

Odoo ERP customization | Python | XML / QWeb reporting | Odoo RPC | PostgreSQL (project environment) | PHP | CSV/XLS/XLSX processing | ERP workflows | Integration | Flutter / Dart | Java | Git

PROFESSIONAL EXPERIENCE

PT Naska Jala Dewa | Middle Odoo Developer | Nov 2025 – Present

- Developed an external attendance-import application connected to Odoo 16, processing fingerprint CSV, XLS and XLSX exports with employee matching and preview workflows.
- Implemented handling for duplicate scans, timezone conversion, overnight shifts, attendance reconciliation and overtime/SPL synchronization; maintained targeted regression tests.

PT Arkana Solusi Digital | Dec 2023 – Nov 2025

Middle Odoo Developer (Jan–Nov 2025) | Junior Odoo Developer (Dec 2023–Jan 2025)

- Participated in an Odoo 11-to-17 upgrade engagement and customized enterprise reporting layouts with data behavior triggered by report printing.
- Worked on Odoo-SAP data synchronization and purchasing-to-invoicing flows, including goods receipts, invoiceable quantities, installment billing and staged testing.
- Customized finance and manufacturing workflows: Direct Payment Vouchers, invoices, warehouse and delivery documents, production reports and purchasing/sales adjustments.

Universitas Terbuka | Flutter Developer | Jun 2022 – Jan 2023

- Contributed to Bahan Ajar Interaktif UT (ABADI), a digital learning-materials app available on Android and iOS.
- Worked as a frontend developer on UT Radio, the university's radio and educational content website.

PT Bintang Pelajar | Flutter Developer | Oct 2020 – May 2022

- Developed a Flutter-based employee attendance and personnel application; maintained the Bintang Pelajar LMS mobile app.

PT Yutaka Manufacturing Indonesia | Software Development Intern | Mar–Aug 2019

- Built a PHP-based application to replace an Excel-based operational workflow.

INDEPENDENT SOFTWARE DEVELOPMENT

Freelance / independent projects | Started Feb 2018 (end date not confirmed)

- Built independent web applications and education/finance systems; project scope and release status vary.
- Selected work: GeraM and Indonesia Mengaji (2018); SMAFG academic, finance and admissions systems (2026).
